

The California Local Technical Assistance Program

The California LTAP Center is based at the Center for International Trade & Transportation (CITT) at California State University Long Beach

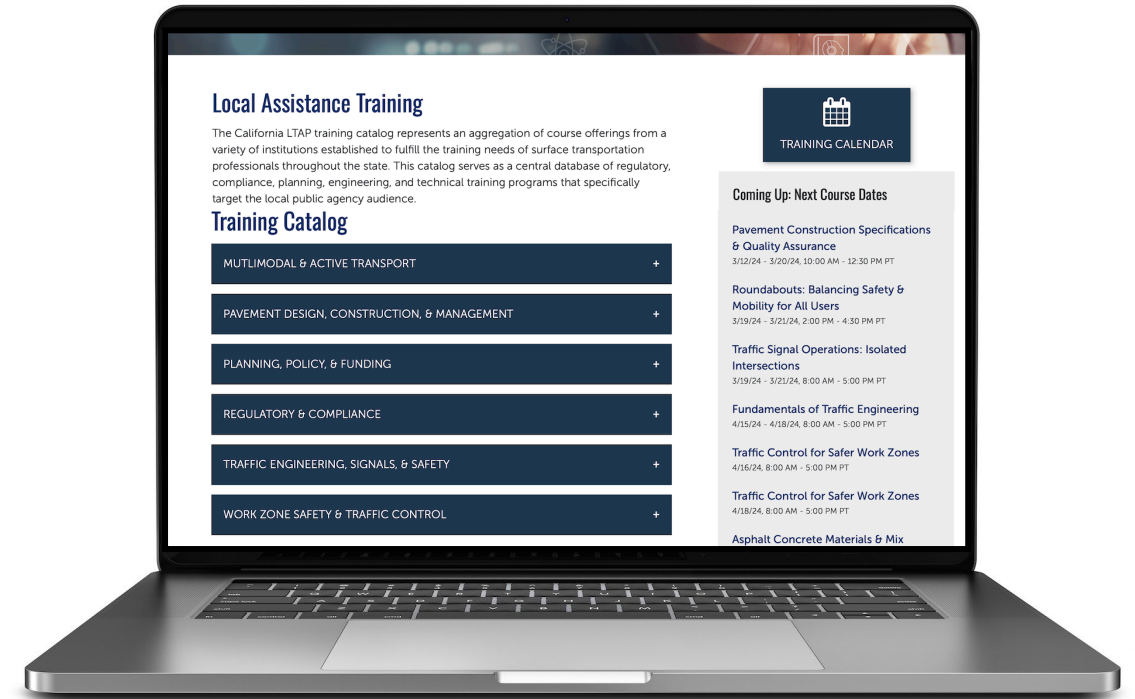

“We are keenly focused on expanding our Center’s reach and engagement and to be more receptive and responsive to the needs of a broader range of local public agencies in California, including those of underserved and disengaged smaller, rural, and tribal communities.”

— Tom O’Brien, Director, California LTAP

Visit caltap.org to Find Local Agency Training

- Comprehensive subsidized training catalog
- Course titles searchable by topic:
 - *Multimodal & Active Transport*
 - *Pavement Design, Construction, & Management*
 - *Planning, Policy, & Funding*
 - *Regulatory & Compliance*
 - *Sustainable Engineering & Construction*
 - *Traffic Engineering, Signals, & Safety*
 - *Work Zone Safety & Traffic Signal Control*
- Scheduled classes viewable by calendar date
- Individual course descriptions & details
- [Subscribe](#) to stay up-to-date!
